Super cute game, great sound, creative game play, highly recommended!. For those interested, the developers finally added the Sacred Ordealia Grove soundtrack. It was originally missing but they just added that track on August 14th.

With that in mind you can finally enjoy the complete soundtrack.  
I'd say its worth it.. Worth checking out for sure, as I have yet to find anything quite like it.

The game features a persistent world where players battle it out for resources and eventual victory over the course of days/weeks. It uses basic rts elements and expands upon the strategy through time, space, and player interaction.

It is also being constantly updated, and upgraded and there is a good chance if you think a feature is missing it will be added soon.

Highly recommend checking it out for some slower paced and social rts gaming, similar to a more drawn out risk experience in a lot of ways. If you decide to give it a try, join the discord and start plotting your rise to power.. Super Mega Neo Pug is one of those simple yet addictive 2d endless runner games. There's nothing different about it, it's pretty fun with some some catchy music and some nice themes going on. This review won't be long since there isn't much to talk about with this type of game, you can just see the video below which is self-explanatory how this game is. It's a very simple game but its too addictive at the same time.

Gameplay is straight forward, you're constantly moving and holding the mouse button will make you fly up and if you let go of the button you descend down and if you end up at the bottom of the screen, you die. There's stuff flying everywhere including birds, bees, ice cubes(what?), snow balls, comets, rocks etc. There's boss fights too where a boss would appear and throw things at you and you have to dodge them. There are coins too which you can collect as well as some power pickups like a magnet which will collect coins even if you don't go through them. The other power-up is a shield which makes you invulnerable for a short time and anything you touch will die.

Every time you start a game there's a different theme every time. Some these include Egyptian theme, Space theme, Winter snowing theme etc. Other than that you can unlock new characters such as Santa pug, Sombrero wearing pug, a panda, a dragon, a hamster etc.

The sound in this game is so cute and especially the different themes' music sound really relevant to their themes.

Conclusion: Cute game, cute music, addictive gameplay and only 99 cents (as of this review it's 40% off and 59 cents), it's a bargain. Even if you play 2 hours, it's worth it.

Gameplay video below:

<http://steamcommunity.com/sharedfiles/filedetails/?id=682548308>. I'm having a blast. The movement is fun and the gameplay is fast. Whenever I die I feel like its on me because there are plenty of opportunities for me to get away as scavenger and whenever I'm hunting its up to me to use my tools wisely. Sometimes I get kills and sometimes I don't. That's the nature of the game to outplay the other side after all. I can't wait for more cosmetics and characters to be added to the game. Though so far Fog is everything I'd ever wanted for a character so I'm not really pressed for too much. Good job devs on relaunching the game.. It's not WORKING. I Can't input name correctly in english, japanese, chinese, any languages in this game. When i play this game the character is married, and i play until the baby is born. i want to name the baby. all the game is stopped over there can not move, only can do is (ALT F4), please fix it.

From a (super newbie) bass player's prespective.

Are you a newbie?  
Slides got you down?  
Tired of songs requiring you use too many strings? Too many flourishes?  
Not quite used to moving all over the fretboard?  
Are you looking for a song that will boost your confidence?  
Look no further!

This DLC is perfect for the player who is a little down that they're having issues learning some of the more 'advanced' techniques. In this track requires you to use 2 strings and move about 5 spaces on the fret board. At its most intense, you'll need to strum twice a second (if that). It's rather tame. Additionally you'll get some practice muting the strings.

That's it, that's all there is for this track. It's rather simple, but your part in the song is very pronounced compared to some other tracks. This makes it much easier to hear how you're doing once you start to memorize the track.

All in all it's a simple track that can provide you a little mastery in a song. A top pick for bass newbies getting into the game for sure.

This game was complete and utter trash. The weird guy in the treehouse wasn't funny at all. When the aliens see me it's almost as if they teleport. There's nothing wrong with the gamelay as it is clear it is supposed to be that way, still, repetitive and boring though. This game is not worth however much it is(I don't even know how much it costs, that's how much I don't like it), and to be honest it's not worth anything.. its a load of rubbish . Casting is useless with no rod setups or any way of changing things it pretty boring. Tiny Tina's campaign is worth the price of admission alone.

Also, I think the recent 2K fortnite\_stote exclusivity bs has shown the true face of 2K greed. Charging 20 bucks for a season pass of good content is nothing compared to that.. This may not look like its alot because they are paper zombies. Well I was wrong this is incredible fun and addicting the weapons feel like a blast to shoot. And it gets really intense the later wave's. I own about 50 vive games so far and this one is definetly in my top 3 of them. Yeah its another wave defender but this one is really good and not early access.. Mine is laggy and I have an i5 4690@3.7Ghz with a gtx 960 2gb gddr5, 8gb RAM.

... I think that my computer is powerful enough to run this game, isn't it?

Putting away that lag that make the game unplayable it is pretty funny and skill demanding so... I like it.. There is no legit reason this shouldn't be in your library.. This DLC still has lots of bugs, several heroes seem to have glitched run/walk cycles and just glide around, if you convert them they just constantly seek pay and take all your money, if you put them in combat they'll just crash your game.

Maybe buy it if it's on sale but otherwise don't do it yet until they fix the bugs in this DLC and possibly even the main game.. This is a lovely little game. A board wargame at heart. Imagine being sat across the table playing someone with the computer conveniently sorting out all the rules for you. Movement, combat and morale are all dealt with seamlessly, without a table or chart in sight. (The tables and charts are there, but you just dont see them as the computer deals with the trivial for you ) It still feels a little early in development but at the price Im not complaining.

Online play works well and I havent experienced the bugs previous players are talking about. But I've actually had the most fun sat playing a live face to face game on the same pc. Probably because you can banter, mock more easily :-)

Chat mode in online multiplayer please?

Default settings have all sound switched off which is a little odd, but once id switched on the effects it felt more alive somehow ( leave the music off obviously )

I expect there will be a few patches addressing the occasional niggle but the core game works well.

A nice attempt to make a very accesible ACW.. This game is fantastic! A lot of fun with the vive. It's super addicting.
